

MODEL 200 POWERED TURNTABLE CONVEYOR

When your plant layout requires a directional change in the smallest possible space, you should consider using a Titan Powered Turntable. The turntable can be used for product sortation, accumulation as well as directional changes. The Titan Turntable is available in sizes ranging from 2' diameter to 10' diameter. The standard table top is 7 gauge construction with angle iron supports. The top is driven by either chain and sprockets or a contact wheel. The unit is furnished with expanded metal guards on all four sides. Roller supports supplied as optional equipment. The unit can be supplied with chain and sprocket drive, air operated for 90° rotation or no drive for manual indexing. Tops can be fitted with gravity roller or chain driven live roller conveyor to suit your application
