Slider Bed Conveyors

Model 102 MINI-PRO Press Conveyor to solve small part or scrap handling problems

The MINI-PRO has a 1 1/2" low profile frame that will easily fit under most die parallels to quickly remove scrap or finished parts. A KNURLED 2" diameter drive pulley provides positive belt pull under extremely oily conditions. MINI-PRO's narrow frame width (belt width plus 1/2") is unique for this type of conveyor. A bottom mounted drive is furnished as standard but a top mounted drive arrangement is optional. Other optional features available are vertical or flared siderails to suit your application, supports as required, different belt types and special belt speeds. Standard belt widths from 2" to 24" wide, with lengths from 2' to 10' maximum as standard.

Model 104 Slider Bed Belt is designed with the systems approach in mind

The **Model 104 Slider Bed Belt** is designed with the systems approach in mind. The square head and tail end terminals allow you the flexibility to combine this unit with other Titan units to assure a continuous flow of material. The standard 4" deep formed 12 gauge frame allows integration with several other types of conveyors available from titan. Screw type take-ups and 4" diameter crown face pulleys are some of the standard design features. Modular design allows you the flexibility to add additional sections if required. Your material handling requirements can be solved by the experts at Titan.

MODEL 104 SLIDER BED CONVEYORS SPECIFICATIONS		
	Standard	Options
Belt Widths	12", 18", 24", 30", 36"	4", 6", 8", 10", 14", 16", 20", 40"
Lengths	5' min. to 40' max	3' min to 50' max
Belt Type	PVC 120 Black	Rough top, food grade, V-guide on bottom, belt to fit application
Drive	1/2 HP 230/460/3/60	3/4, 1, 1-1/2, 2 HP, 115/230/1/60, 575/3/60, TEFC, washdown, severe duty, inverter duty, brake motor
